

Reverse Auction System - Complete Flow Diagram

System Flow Diagram:

Step-by-Step Explanation:

- 1. Job is created and auction starts in ACTIVE state.
- 2. Vendors place bids in real-time. They can re-bid multiple times.
- 3. Each vendor can see their Latest and Previous bid.
- 4. When auction time ends, status changes to CLOSED.
- 5. Admin manually assigns the job to any vendor.
- 6. Final deal amount becomes visible to all vendors.
- 7. Non-winning vendors get refund status as PENDING.
- 8. Refund is processed within 7 days and marked as REFUNDED.

Advantages of This System:

- • Fully Transparent Deal Amount after assignment.
- • Live real-time bidding improves competition.
- • Vendors can track their bidding history.
- • Admin has full control over final assignment.
- • Secure – Vendors cannot see competitors' identities.
- • Structured refund lifecycle with status tracking.
- • Scalable and production-ready architecture.
