

☒ Manager Approval – Reverse Auction Plan

☒ One-Line Summary

The basic reverse bidding system is already built. This phase will add paid bid registration, automatic auction duration, refund handling, invoice emails with bidding links, UI improvements, testing, and final production launch.

☒ Project Goal

The goal of this project is to upgrade the current reverse auction system so that:

Auction starts automatically when a job is created.

Default duration is 24 hours.

Admin can extend the timer if more vendors are needed.

Vendors must pay a small registration fee to bid on each job.

After payment, vendors receive:

Invoice email

Direct bidding page link

When auction closes:

One vendor is selected

Other vendors get refund as per policy

System remains transparent and automated.

☒ Timeline Overview (Nov – April)

☒ Nov – Jan | Completed

Work already done:

Reverse bidding base system created

Database migrations added

Bidding tables implemented

Admin dashboard for viewing bids

Backend APIs working

Frontend bidding screens ready

Timer logic added

Database tested

End-to-end testing completed

☒ February | In Progress / Planned

Business-level automation:

Paid per-job bid registration

Registration fee calculation from job value

Payment gateway integration

Invoice email system

Direct bidding URL in email

Refund automation

Pre-payment confirmation message

Auction auto-start

Default 24-hour duration

Admin extend timer option (48h / 72h)

☒ March | Planned

User experience improvements:

Vendor dashboard upgrade

Countdown timers improvement

Live bid updates

Notification optimization

Admin screens polish

Mobile responsive UI

Performance tuning

☒ April | Planned

Final launch preparation:

Load testing

Security checks

Edge-case handling

Payment & refund testing

Final QA

Production deployment

Monitoring dashboards

Usage metrics tracking

☒ Example Flow (Simple)

1☒ Client posts job ☒ auction automatically goes live for 24 hours.

2☒ Vendor clicks “Register to Bid” ☒ pays fee ☒ gets invoice + bidding link in email.

3☒ Vendor opens link ☒ submits bid.

4☒ Auction ends ☒ winner selected ☒ other vendors refunded.

5☒ Admin only extends time if needed.
